**Public Notice**  
Wildfire Prescription for Local Forest – The Pond Forest  
Planned Treatment Schedule – November 2013

**Objective:**  
Town Council recognizes that forest areas adjacent to the town have individual intrinsic values to each individual in the community. The Wildfire Protection Plan has identified areas around the town that require harvest/shrubculture treatments in order to reduce the risk of wildfire damage to the town. The Community Forest is reaching out to get public support in the fireproofing of the pond area adjacent to the town.

**Description:**  
The area planned for wildfire risk reduction is located on municipal lands owned by the town. This area is predominantly forested with pine spruce and aspen. A small hollow pond is situated near the center of the entire area. This area is identified under the Official Community Plan as Town Center Commercial, general commercial, multifamily residential and parks and recreation. The forested area is 30.3 hectares. The area is identified as a wildfire high risk area near the town and is targeted for treatment to reduce the risk of a wildfire encroachment to town property and its citizens. Mountain pine beetle has infested the stand killing most of the pine trees requiring to approximately 50% of the stand.

**Area Prescription:**  
Once harvested, establish trail bed (see Aerial View of Planned Harvest Area Block 21 - dark purple dashed line) from existing block road similar to the Nordic trails for horse, wagons, snowshoe, and non-motorized use. Connect to Quality Canyon trail system. Connect trail to Nordic cabin for snowshoe use. Harvest cut to length with Forwarder/Retainer. Retain immature and deciduous trees to create visual corridor from highway. Use faller selection to remove dead and non-wind-firm spruce and pine trees. Log and scatter tops and branches. Mark the timber while still viable. Thin stems along highway to create visual screen between highway and opening. Area after harvest to a recommended wildfire stocking level. Use firewood for local use. Use site for outdoor shelter along trail route.

**TUMBLER RIDGE COMMUNITY FOREST**

We are looking your participation in Tumbler Ridge Community Forest.

**Quarterly Public Meeting**  
Thursday May 18th, 2017 5:00 pm.

We are looking for your input on topics such as:

- How the Community Forest is progressing so far?
- What are the plans for the next few years?
- What is the Community Forest doing regarding Community Wildfire Protection?
- How to apply for upcoming grant funds.
- Where is the Community Forest expanding?
- Where would you like to see Community Forest re-invested?

**TUMBLER RIDGE COMMUNITY FOREST**

**Council Chambers**  
Thursday – May 18th, 2017  
5:00 pm

**Come out and be heard!**  
The management of the forest is in your hands. We are soliciting your input. Come and participate in the Boards management of the forest that surrounds Tumbler Ridge.

**Come and participate in the Boards management planning of the forest that surrounds Tumbler Ridge.**

**Public Notice**  
Community Forest Planned Harvest  
North of Horse Stables  
Planned Harvest Schedule - August/Fall 2016

**Objective:**  
The Community Forest has been approached to develop a horse/snowshoe/multiuse non-motorized trail to connect Quality Canyon Trail to a trail route from the horse stable area north of town. The Community Forest is planning this area to harvest to facilitate this connection. The area is in moderate to high wildfire threat class within 2 km radius of town. Treating the area to moderate wildfire behaviour is also objective of the harvest prescription.

**Description:**  
The proposed area is crown land within the Community Forest licence area. The forested area is approximately 51 ha of over-mature timber in a state of decay (See Mortality map that illustrates 30-50 % of trees are dead). The forested area is medium to high wildfire threat class (See Wildfire Threat Class Map). A trail system through this forested area is unsafe.

**Area Prescription:**  
Once harvested, establish trail bed (see Aerial View of Planned Harvest Area Block 21 - dark purple dashed line) from existing block road similar to the Nordic trails for horse, wagons, snowshoe, and non-motorized use. Connect to Quality Canyon trail system. Connect trail to Nordic cabin for snowshoe use. Harvest cut to length with Forwarder/Retainer. Retain immature and deciduous trees to create visual corridor from highway. Use faller selection to remove dead and non-wind-firm spruce and pine trees. Log and scatter tops and branches. Mark the timber while still viable. Thin stems along highway to create visual screen between highway and opening. Area after harvest to a recommended wildfire stocking level. Use firewood for local use. Use site for outdoor shelter along trail route.

**Public Notice**  
Wildfire Prescription for Local Forest – The Golf Road Forest  
Planned Treatment Schedule - October 2014

**Objective:**  
Recently completed August 2014 Tumbler Ridge Wildfire Protection Plan has identified areas requiring treatments with the intention to reduce the risk of wildfire threat to the town. The plan is regarding the fireproofing of the golf course road area adjacent to the town.

**Description:**  
The crown land within the Community Forest licence area. The site encompasses a wildfire high-risk area near the town and is targeted for treatment. The area is identified under the Official Community Plan as Town Center Commercial, general commercial, multifamily residential and parks and recreation. The forested area is 30.3 hectares. The area is identified as a wildfire high risk area near the town and is targeted for treatment to reduce the risk of a wildfire encroachment to town property and its citizens. Mountain pine beetle has infested the stand killing most of the pine trees requiring to approximately 50% of the stand.
