The Chinook Comfor Board of Directors passed a motion to distribute 35% of the net income to Chinook's partners based on their percentage of ownership. Chinook Comfor Limited Partnership will retain 65% of earnings for operating expenses, silviculture, and roads.									

LIMITED PARTNERSHIP

General Partner Chinook Comfor Limited

Board of Directors

General Manager

Staff, Contractors, Local Business

Mission Statement

Chinook Comfor Ltd is committed to managing our renewable resource by collaborating to build community capacity. We will achieve this by creating self reliance through long-term environmental sustainability for economic and social growth.

Vision Statement

Chinook Comfor Ltd. will be a leader in forest practice management, social values, and economic development.

**CHINOOK
COMMUNITY
FOREST**

105,000 Hectares
65,000 THLB

Annual Allowable Cut (AAC)

Chinook Community Forest has an AAC of 150,000 cubic meters per year for the first three years.

The AAC drops to 63,000 cubic meters per year for the last two years of the five year cut.

2021 Chinook Community Forest will perform an AAC calculation to determine its long-term AAC.

Benefits to the community through donations and sponsorships.

A scenic landscape photograph showing a large body of water under a cloudy sky. In the foreground, there is a wooden platform on the left and a concrete picnic table with benches in the center. The ground is covered in green grass and yellow wildflowers. To the left, a sandy beach with driftwood is visible. In the background, there are distant mountains.

RECREATION

LOGGING OPERATIONS

SILVICULTURE

Chinook will require
4.8 million seedlings
in it's first 5 year
cut control

Chinook is planting
649,000 seedlings
this year

Includes Douglas
Fir/Pine/Larch and
Spruce

Chinook Jargon gave travellers and traders from very [diverse cultures](#) with completely different languages the ability to communicate with each other thereby promoting the exchange of goods, services, and ideas over vast areas of country.

A common belief was that Indigenous Peoples were living in isolated communities, limited by topography. This isolation was thought to prohibit them from moving large numbers of goods, services, or ideas. In fact, prior to contact by European explorers, Indigenous Peoples had extensive trade networks in place allowing for the movement of people and goods over hundreds of miles at a time.

The language really exploded, but in an altered state, with the [arrival of Europeans](#), and their need to trade, and the need for First Nations and Native Americans to have words to identify unfamiliar objects. The original Chinook Jargon had a number of sounds that were difficult for Europeans to pronounce so early settlers and traders adapted the more commonly used words into ones they could pronounce. Thus, a simplified version of the language was created. By the end of the 1900s, this simplified version of the Jargon was extensively used throughout the Pacific Northwest.
