Building Wealth  
with Wood

First Nations' Wood Products Technical  
Support Program

We support First Nations in improving their wood products' and/or businesses, and in their attempts to extract value from their forest/tenure allotments by providing access to industry specialists and manufacturing solutions. We can help accelerate the development of your wood products business, as well as assist with implementing new manufacturing processes. We provide on-site assistance, market research, housing technical support, and workshops and seminars to help you and your employees solve production problems, increase productivity, reduce costs and by new technologies.
